Re: Amendment to Convention Center Authority Charter

Dear Chairman Dickens and Members:

As you know, the Charter for the Convention Center Authority provides that the Board of Directors is to consist of nine members. At the time the members of the Board of Directors for the Convention Center Authority were confirmed by the Council in October 2008, a number of Members of Council commented that none of the nine members appointed by the Mayor have expertise in the construction, engineering, and architectural fields. While the nine members appointed are certainly well-qualified to operate and manage a new convention center, I continue to believe it is important, at least during the construction phase of the project, for the CCA Board of Directors to include persons with experience and expertise in the design and construction of large facilities.

The state enabling legislation for the Convention Center Authority sets forth a procedure for amending the Charter of the CCA. The Board of Directors must first submit an application to the Metropolitan Council seeking permission to amend the Charter and setting forth the proposed amendment to be made. The Council then must approve the amendment by resolution before it is submitted to the Secretary of State.

I am respectfully requesting that the CCA Board of Directors submit a proposed amendment for approval by the Council adding the following three positions as non-voting members of the Board to serve during the construction phase of the project: a structural engineer, an architect with experience in the design of large commercial facilities, a person with expertise in the construction industry. I believe this change will benefit the existing board, and will help protect the project from unnecessary cost overruns.

Thank you for your attention to this matter, and I look forward to hearing from you.

Sincerely,

Eric Crafton
Councilman - District 22
